Summary

I am an independent and self-motivated front-end web developer passionate about creating seamless user experiences. With experience in building responsive web applications and practical skills in programming with various tech stacks, I thrive in collaborative environments, demonstrating problem-solving abilities and a strong commitment to meeting project goals.

Education

J B Institute of Technology

Bachelor of Technology in Computer Science

Aug. 2023 – Aug 2027

Dehradun, Uttarakhand

Relevant Coursework

- Data Structures
- Algorithms Analysis
- UI/UX Design
- Web Development
- Object-oriented programming
- Internet Technology

Experience

YBI Foundation

June 2024 – July 2024

Python Programming Intern

- Developed a QR-based Ordering System for cafes, enabling customers to place orders directly through scanned QR-code, streamlining the ordering process. .
- Designed a user-friendly interface and integrated back-end functionalities using Python and database connectivity.
- Gained hands-on experience in project management and coding for real-world applications.

Hack-A-Thon (Inter-collegiate)

16/17 feb 2024

Web Development

Organized by Tech-Know-Giant Club

- Designed and developed a transportation booking landing page inspired by Uber Technologies, enabling users to simulate booking cars or rides.
- Implemented responsive web design using HTML, CSS, and JavaScript to ensure accessibility across devices.
- Collaborated with a team to brainstorm and build the project under a strict deadline, showcasing problem-solving and teamwork skills .
- Delivered a functional prototype demonstrating real-time features like booking options and dynamic User Interface elements.

Projects

Spotify clone | **Technologies:** HTML CSS JavaScript

Sept 2024

A web application emulating the Spotify music streaming platform.

- Built a Spotify clone using HTML, CSS, JavaScript, integrating API calls for dynamic data loading. Focused on creating a responsive and interactive user interface for seamless music streaming.

E-Commerce | **Technologies:** HTML CSS JavaScript

Aug 2024

A front-end web application for e-commerce functionality.

- Developed a responsive front-end E-Commerce web app with features like Add to Cart and Sales Timer using HTML, CSS, JavaScript. Integrated API calls for dynamic product data and real-time updates

Currency Converter | **Technologies:** React, Tailwind CSS, JavaScript

Nov 2024

A web application for real-time currency conversion.

- Built a responsive **real-time currency converter** using **React**, implementing modern React features like **hooks** for state management.
- Integrated with a **currency exchange rate API** to dynamically fetch and update real-time exchange rates.
- Designed an intuitive user interface with seamless input and currency selection functionality.
- Ensured cross-browser compatibility and mobile responsiveness for optimal user experience.

Technical Skills

Programming Languages: Java, C, HTML/CSS, JavaScript, C++, Python

Developer Tools: VS Code, Git

Technologies/Frameworks: React, GitHub, Tailwind, Bootstrap

Version Control : Git, GitHub

Soft Skills : Teamwork, Collaboration, Communication
